DIRECCIONES FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ LABEL CAREFULLY.** Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

USE RESTRICTIONS: Use only to control house mice. This bait station may be used in and around (within 50 feet of) homes accessible to children and pets, consistent with all use restrictions and other requirements indicated on this label. Do not apply further than 50 feet from home or building. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come into direct contact with food.

SELECTION OF TREATMENT AREAS: Determine areas where house mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings in corners and concealed places or in locations where there are signs of house mice.

TO CONTROL HOUSE MICE:

1. Remove the bait station from the carton
2. Placement: Place along walls or in corners with the entrance holes exposed. Place bait stations at 8- to 12- foot intervals in appropriate locations in infested areas, as specified on this label. Make sure that mouse entrance holes are exposed. Maintain stations for a minimum of 15 days or as long as activity persists. Replace bait station if contents have been consumed, damaged, or if bait is exposed. If bait is not touched after 3 days, move station to a new location where mouse activity is evident. Wearing gloves, collect and dispose of all dead animals and leftover bait properly as specified on this label. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment.

PRECAUTIONARY STATEMENTS:
