Use to Control Algae and Suppress Growth of Bacteria in Spas and Hot Tubs.

Use chemical-resistant gloves made of any waterproof material: Chemical Resistance Category A.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION
Cleanwater Blue™ is an innovative, unique formulation used for control of algae and suppression of bacterial growth in spas and hot tubs. Cleanwater Blue™ inhibits or suppresses the growth of bacteria. When used as directed on this label, it is a bactericide.

APPLICATION AND HANDLING EQUIPMENT
Application, handling or storage equipment MUST consist of either fiberglass, PVC, polypropylene, viton, most plastics, aluminum or stainless steel. Never use mild steel, nylon, brass or copper around free strength Cleanwater Blue™. Always rinse equipment full and clean of Cleanwater Blue™ each night with plenty of fresh, clean water. Always store Cleanwater Blue™

above 32 degrees F. Freezing may cause product separation. Seller makes no warranty for product which has been frozen. Use formula for calculating water volume and flow rates. To find the capacity of water storage containment in gallons, multiply the water volume in cubic feet times 7.5.

NOTE: 1 cfs/hr = 27,000 gallons
1 acre foot = 326,000 gallons

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in a safe place away from pets and keep out of the reach of children. Store away from excessive heat. Cleanwater Blue™ will freeze. Always keep container closed. Store Cleanwater Blue™ in its original container only. Keep away from galvanized pipe and any nylon storage or handling equipment.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess Cleanwater Blue™, spray mixture or rinsate is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. In the event of spill, neutralize with limestone or baking soda before disposal. May deteriorate concrete.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

SPECIFIC DIRECTIONS FOR USE

To Control Algae in Spas and Hot Tubs: Treated pool effluent should not be discharged where it will drain into lakes, streams, ponds or public water. For spas and hot tubs, apply at the rate of 5 ml of Cleanwater Blue™ per 100 gallons of water. This will yield a rate of less than 1.0 ppm metallic copper. Application should be made before visible algae appear. Repeat a maintenance dosage every 2 weeks to maintain the recommended concentration and avoid excessive buildup of metallic copper. Cleanwater Blue™ may be used to help control pool odors, bacteria and algae during the winter months.

LIMITED WARRANTY AND LIMITATION OF REMEDIES

Seller warrants that the product conforms to the chemical description and is reasonably fit for the purpose stated on the label for use under normal conditions, but makes no other warranties of FITNESS OR MERCHANTABILITY expressed or implied, or any other warranty if the product is used contrary to the label instructions, or under abnormal conditions or under conditions not foreseeable to the seller. In no case shall the seller be liable for more than the cost of this product to the buyer and will in no event be liable for any consequential, special or indirect damages connected with the use or handling of this product. This product is offered and the buyer or user accepts it subject to the foregoing terms which may not be varied.
