AXCELA™

FOR CONTROL OF SNAILS AND SLUGS

A soil surface treatment for control of snails and slugs around ornamentals, listed small fruits & berries, citrus, listed vegetable crops and grass grown for seed. **For more information visit www.metaworksbest.com**

Axcela pellets are an effective metaldehyde containing bait application which are readily ingested by slugs, especially by species belonging to the genera *Arion* (e.g. *Arion hortensis*, *A. circumscriptus*), *Deroceras* (e.g. *Deroceras laeve*, *D. reticulatum*), *Milax* (e.g. *Milax gagates*) and the snail *Helix aspersa*. After ingestion slugs are immobilized. Death follows by destroying the mucus-forming tissue and the resulting loss of water. Best results are achieved by application during mild damp weather when slugs are most active but when rain is not expected.
