**PROVADO® 1.6 Flowable Insecticide**  
**For Use on Dasheen (Taro) leaves**

EPA Reg. No. 264-763  
 SLN. No. HI-040003

Issue Date: September 12, 2007  
 Expiration Date: September 11, 2012

## 24(c) Supplemental Label

### FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF HAWAII

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This label must be in the possession of the user at the time of pesticide application. All applicable directions, restrictions and precautions on the EPA registered label are to be followed. This label is valid until September 11, 2012 or until otherwise amended, withdrawn, canceled or suspended

RECOMMENDED APPLICATIONS		
CROP	PEST	RATE PER APPLICATION
Dasheen (Taro) leaves (leaf production only)	Aphids	3.75 fl oz per acre
<b>FOLIAR APPLICATION ONLY</b> Do not apply directly to water or to areas where surface water is present. For applications in wetland production, fields must be drained prior to application. Aphid Control: Apply specified dosage to leaves as needed for control. Good coverage of the foliage is necessary for optimal control. A spray adjuvant may be used to improve coverage. For best results, time application before a damaging population becomes established. PROVADO 1.6 Flowable will not knock down heavy aphid populations. Allow at least 7 days between last application and harvest. Allow at least 5 days between foliar applications. Do not apply more than a total of 18.75 fluid ounces of PROVADO 1.6 Flowable per year as foliar sprays (See NOTE). Do not harvest corms for food or feed. For resistance management purposes, a PROVADO foliar application following a soil application of ADMIRE in the same crop is not recommended. NOTE: Regardless of formulation or type of application (soil or foliar), do not apply more than a total of 0.5 lb active ingredient of ADMIRE or PROVADO per acre per season.
