ACCEPTED

December 7, 2011

Under Hawaii Pesticides Law as Supplement to Product No. 9200.123

SPECIAL LOCAL NEED 24(C)LABELING

DUPONT™ ESCORT XP HERBICIDE SPOT TREATMENT FOR CONTROL OF WILD GINGER IN THE STATE OF HAWAII

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF HAWAII

DUPONT™ ESCORT® XP HERBICIDE

EPA Reg. No 352-439

SPOT TREATMENT FOR THE CONTROL OF WILD GINGER

EPA SLN No. HI-060004

Table with 2 columns: Ingredient Name and Percentage. Active Ingredient: Metsulfuron methyl Methyl 2-[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)amino]carbonyl]amino]sulfonyl]benzoate ..... 60% (by weight). Inert Ingredients ..... 40% (by weight). TOTAL 100%

GENERAL INFORMATION:

DuPont™ ESCORT® XP herbicide is a dispersible granule that is mixed in water and applied as a spray. The use of ESCORT® XP under this Special Local Need registration is specific to spot application(s) for control of wild ginger (Hedychium sp.) in forests (montane wet forest, mesic forest), forest margins, and other mid to high elevation wildland areas where this plant is invasive.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Target pest: Wild ginger (Hedychium sp.).

Application Sites: Forests, forest margins, and access roads and trails.

Application Rate: Apply 0.067 - 0.133 ounces (1.9 - 3.8 grams) of ESCORT® XP per gallon of water (1/2 - 1 gram ESCORT® XP per liter of water) for spot treatments, not to exceed 3 ounces (85 grams) per acre per year within the spot treatment area.

Methods of Application: Spot applications may be made using backpack sprayers, hand-held tanks, spray bottles, or lab squirt applicator bottles. Apply to the leaves, exposed rhizomes, and cut surface or stalks and rhizomes. To maximize uptake when treating cut ginger stems and rhizomes, cut into dormant corms and apply ESCORT® XP solution. When applying ESCORT® XP solution, avoid run-off or overspray onto soil by directing spray at ginger surface rhizomes or foliage only.

ESCORT® XP may be combined with a non-ionic surfactant to improve foliar uptake.

The use of a dye is recommended to track sprayed solution.

Frequency of Applications: Spot applications to limit regrowth may be made on an as-needed basis.

PRECAUTIONS

Do not apply using high volume power sprayers.

Do not apply as a broadcast application.

Do not apply this product through any type of irrigation system.

Avoid spray drift near streams or irrigation ditches.
