

## Section 24(c) Special Local Need Label

**FOR DISTRIBUTION AND USE ONLY IN THE STATE OF  
HAWAII**

**ACCEPTED**

September 14, 2012

**Under Hawaii Pesticides Law  
as Supplement to Product No.  
9226.220**

**Evik<sup>®</sup> DF Herbicide**

**EPA Reg. No. 100-786**

**EPA SLN No. HI-120004**

**Issue Date: September 14, 2012**

**Expiration Date: September 13, 2017**

**For Weed Control in Sugarcane**

**KEEP OUT OF REACH OF CHILDREN**

### **CAUTION**

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL  
MAY RESULT IN POOR WEED CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

---

#### **Directions for Use**

---

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Follow all applicable directions, restrictions, and precautions including statements pertaining to the Worker Protection Standard, on the EPA-registered Evik<sup>®</sup> DF label.

This label must be in the possession of the user at the time of pesticide application.

Evik DF Herbicide is used in sugarcane for control or suppression of many grass and broadleaf weeds.

---

## Directions for Use

---

### Application Procedures

Refer to the Evik® DF Herbicide label for application details, recommendations, precautions and restrictions.

For wind speeds at or below 10 mph, refer to the Evik® DF Herbicide label for specific drift precautions.

For wind speeds between 10-20 mph, do not apply this product in a manner that allows spray to drift from the application target site and cause harm to humans, animals and other non-target sites.

Application methods to reduce off-site drift include, but are not limited to the following:

1. Use drift reduction nozzles that deliver coarser spray (ASAE 572) or a volume mean diameter of 475 microns for spinning atomizer nozzles.
2. Use hooded or shielded sprayers or other means to reduce drift.
3. Apply Evik® DF Herbicide with spray drift retardants and/or other measures to control drift.

Notes: For backpack application in sugarcane greater than 4 feet tall and using a directed spray to the base of the sugarcane plant, a wind speed limitation shall not apply.
