**ETHREL® brand Ethephon Plant Growth Regulator for Pineapple and Sugarcane**

**For Use on Macadamia Nuts**

**EPA Reg. No. 264-257**

**SLN No. HI-840004**

Issue Date: September 7, 2009

Expiration Date: September 6, 2014

**24(c) Supplemental Label**

**FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF HAWAII**

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. All applicable directions, restrictions and precautions on the EPA registered label are to be followed. Do not apply this product through any type of irrigation system.

**HARVEST AID**

Apply a foliar spray of ETHREL® Plant Growth Regulator for Pineapples and Sugarcane to macadamia trees 5 to 12 days prior to shaker harvest. Mix 9.3 to 23.1 ounces of ETHREL® in 100 gals of water (350 to 800 ppm). Apply 100 to 200 gals per acre depending on spray equipment and tree size.

For best results, a thorough uniform spray coverage of leaves and nuts is needed. Some premature leaf drop will be associated with treatment. Do not apply to diseased, low vigor or moisture stressed trees as leaf drop may be excessive.

- Use only one ETHREL® Plant Growth Regulator for Pineapples and Sugarcane spray per season.
- Do not apply within 5 days of harvest.
- Do not graze or feed cover crops.
- Mix only the amount of spray to be used that day.
- Avoid spray drift to nearby crops as this product may cause temporary modifications in plant growth.
- Data suggests the lower rate should be used in dry areas.

This Special Local Need (24(c)) label will be valid until September 6, 2014, or until otherwise revised, amended, cancelled, or suspended by the United States Environmental Protection Agency, the manufacturer, the 24(c) registrant or the Hawaii Department of Agriculture.
