Contains 68 fluid ounces or less	Contains greater than 68 fluid ounces

**If you are unsure whether a product is **IN** or **OUT**, call the State of Hawaii, Department of Health at (808) 586-4226 for assistance in making a determination.**

\*Milk - an opaque white liquid secreted by the mammary glands of female cows, goats, or certain other animals. (note: soy milk is **IN** because it does not fit this definition)

\*\*Concentrate – an intensified, dense, strong, or pure form of something, made especially by the removal or reduction of liquid. (look at the serving size to help determine this, i.e. if 1 tsp is the serving size, it is probably a concentrate)
