

PROPOSED PROJECT FOR DWSRF FUNDING

For State Fiscal Year **2013**

Name of Entity			
Public Water System No.		Public Water System Name	

Project Title	
Project Description	

Please enter figures for the following activities eligible under the DWSRF that you wish to finance:

Phase	Estimated Cost (\$)	Projected Start Date
Planning*		
Design*		
Construction		
Construction Management*		
Construction Contingency (maximum 10% of construction costs)		

* Consultant contracts for these activities may be financed with DWSRF.

DOH Use Only	
System Population	
MHI	
Eligible	
Ineligible (provide reason)	

Check the appropriate boxes, which best describes the proposed project:

Projects to Correct Acute Health Problems:

- | | |
|---|--|
| <input type="checkbox"/> Waterborne Disease Outbreak | <input type="checkbox"/> Nitrate or Nitrite |
| <input type="checkbox"/> Total Coliform Rule compliance | <input type="checkbox"/> Surface Water Treatment Rule Compliance (includes groundwater determined by DOH to be under the direct influence of surface water or GWUDI) |
| <input type="checkbox"/> Fecal Coliform | |
| <input type="checkbox"/> Total Coliform | |
| <input type="checkbox"/> Indication of possible surface water influence to a groundwater source through <i>Giardia</i> , <i>Cryptosporidium</i> , microscopic particulate analyses, etc. While the evidence may not be conclusive enough for DOH to make a determination, the water utility has decided to correct the problem. | |

Projects to Correct Chronic Health Problems:

- | | |
|---|--|
| <input type="checkbox"/> Lead & Copper Rule (90 th percentile values) | <input type="checkbox"/> Organic Chemical |
| <input type="checkbox"/> Lead Action Level (0.015 mg/L) exceedance | <input type="checkbox"/> Inorganic Chemical |
| <input type="checkbox"/> Copper Action Level (1.3 mg/L) exceedance | <input type="checkbox"/> Project to address a currently unregulated or any other contaminant not addressed above |
| <input type="checkbox"/> Infrastructure improvements or replacements to provide safe drinking water. These include installation, replacement, or rehabilitation of eligible water sources, treatment facilities and processes, pumps, storage, transmission and distribution piping, and other eligible infrastructure needs. <u>Projects solely for fire protection or planned expansion of the water system are not eligible for SRF funding.</u> | |

Other Public Health Criteria:

- All water sources serving the system are affected by the same health problem being corrected.
- The public water system has taken interim steps to temporarily resolve the water quality problem and has committed to a definitive, long-term solution

Incentives:

- Small system consolidation ($\leq 10,000$ people)
Project will protect public health by supplying safe drinking water from a qualified local government or a water authority within a certified government to an existing, privately-owned public water system that demonstrates or may demonstrate non-compliance with the current or future state and federal drinking water regulations.
- DOH approved Cross-Connection Control program w/testing
- DOH approved Wellhead Protection or Source Water Assessment program(s)
- The project is required as part of a DOH compliance order.
 - Violation incurred before July 1, 1997
 - Violation incurred on or after July 1, 1997.
- Required Phase II and V monitoring is up-to-date.
- Water Conservation Program.
- Project incorporates sustainable infrastructure (e.g. time of use pumping, wind or solar power generation, replacement of pipelines to reduce water main breaks/leaks, replacement of tank to reduce leaks, high efficiency motors; VFDs, leak detection, hydroelectric generation, etc.)
