WTPO Certification Test Review

by Randy Caskey

This will be a six hour review that covers topics related to the test required for water treatment plant operator certification.

Source Water Protection

by Bill O'Connell

This course will review reasons for a program, methods of protection & setting up a program.

Basic Operations & Maintenance

by Dale Pierson

This material will be aimed at O&M procedures common to treatment and distributions systems. Setting up an O&M program will also be covered.

Operator Math

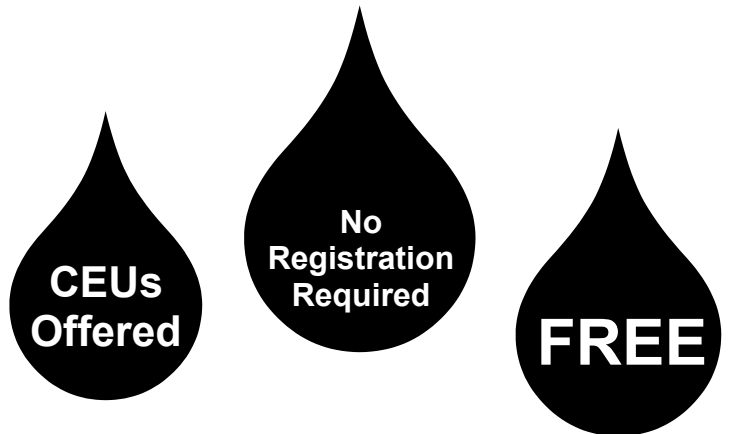

by Matt Holmes

This course will cover solving math problems directly related to water system operations.

Pumps & Motors

by Chris Lovelace

This course will cover various types of pumps and motors and their repair and maintenance.
