

Hawai'i Department of Health Newborn Hearing Screening Program "1-3-6" Performance Update

Goal #1 - Screening before age 1 month, 2000-2006.

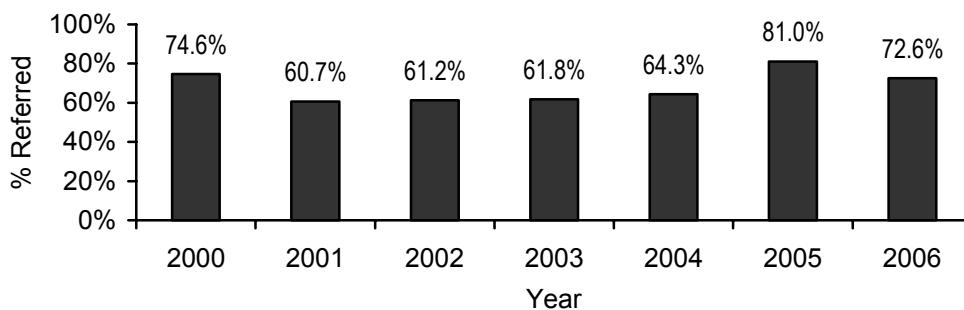

Source: DOH-Newborn Hearing Screening Program, 2/15/08. For 2000 – 2004, denominator excluded deaths < 24 hours. Timeline was based on date of initial screen. New requirements - For 2005 – 2006, denominator excludes deaths and refusals. Timeline now based on date of final screen.

Goal #2 - Diagnostic evaluation before age 3 months, 2000-2006.

Source: DOH-Newborn Hearing Screening Program, 2/15/08. Denominator was the number of infants referred for diagnostic audiological evaluation who did not pass the newborn screen. New requirements - For 2005 – 2006, denominator excludes deaths, refusals and moved out of state. Timeline still based on date of initial evaluation. Consent now required to obtain Part C data.

Goal #3 - Early Intervention before age 6 months, 2000-2006.

Source: DOH-Newborn Hearing Screening Program, 2/15/08. Denominator was the number of infants with permanent hearing loss who did not pass the newborn screen. New requirements - For 2005 – 2006, denominator excludes deaths, refusals and moved out of state. Consent now required to obtain Part C data.
