

Immunization Update 2009

Thursday, August 27, 2009

This course will provide up-to-date information on the rapidly changing field of immunizations. Anticipated topics include influenza (including H1N1 influenza), rotavirus, vaccine safety and vaccine supply. So-called "alternative" vaccine schedules and other emerging vaccine issues will also be discussed.

Course Objectives

After the course, participants will be able to:

- List two recent immunization recommendations made by the Advisory Committee on Immunization Practices (ACIP).
- Describe two emerging immunization issues.
- Locate resources relevant to current immunization practice.
- For pharmacists: Locate resources to assist with patient education in a pharmacy setting.

Target Audience

Physicians, nurses, nurse practitioners, physician assistants, DoD paraprofessionals, pharmacists, health educators and their colleagues who either administer vaccines or set policy for their offices, clinics, communicable disease or infection control programs; both private and public healthcare providers, including pediatricians, family practice specialists, residents, and medical and nursing students.

Faculty

Donna L. Weaver, RN, MN; Andrew T. Kroger, MD, MPH; Iyabode Akinsanya-Beysolow, MD, MPH, FAAP; and William L. Atkinson, MD, MPH; Centers for Disease Control and Prevention and other guest experts.
