Agenda

1. Why Is Verizon Wireless Attending this Event
2. Technology Available to Assist Interpreters and the LEP Community
3. Applications Relevant to Translators & Interpreters
4. Moving Forward Together

Communication Options for Today's Mobile World

Wireless solutions for customers who are deaf or hard of hearing

- When hearing loss makes a standard voice conversation difficult, you can have entire conversations without talking. Simply send and receive **Text Messages** to stay connected.
- Similar to Text Messaging, **Instant Messaging** lets you have real-time text-based chats by linking up with desktop programs such as AIM,® Windows Live™ Messenger and Yahoo!® Messenger.
- By accessing the Internet over your wireless phone, you can check and send **email** by connecting to your AOL or MSN email accounts.
- If you are unable to hear your phone ring, you can set it to **flash or vibrate when receiving an incoming call or text message**.
- Verizon Wireless has made sure that our digital network supports **TTY** devices. The majority of the devices we sell also support TTY.
- Sometimes helping our customers is as simple as having someone on the other end of the line when you need help. By simply dialing **711** from your wireless phone, you have access to a TRS operator who can help with your call.

Wireless solutions for customers who are blind or visually impaired

- **Voice Command** allows you to access certain features by simply speaking into your phone.
- **Text to Speech**—If you cannot easily read the information on your phone screen, you can set your phone to read the information aloud. For example, your phone can read your signal strength, battery status, number of missed calls, or Voice Mail alerts.
- By setting up **Personalized Ringtones**, you can know who is calling simply by hearing your phone ring. If your phone is set for text-to-speech, the specialized ringers are overridden.
- To assist our customers who may not be able to easily read printed materials, Verizon Wireless offers bills as well as product and service brochures—and select device **alternate media formats** including Braille, large print, 3.5 diskette manuals—in, audio recordings and CD-ROM.
- Verizon Wireless offers **free 411 Search®** for customers who are blind or visually impaired.

Communications Options

Mobile Phones

Capabilities Include:

- Voice Communication
- Text Messaging
- Picture Messaging
