

## CALCULATING HOUSEHOLD INCOME FOR 2010 SUMMER YOUTH EMPLOYMENT PROGRAM

If the youth does not qualify under any of the items under #2 on the application form, calculate the youth's household income to determine whether the income is at or below 300% of the Federal Poverty Level.

- a. Count the number of persons in the youth's family *living in the household* at the time of self-certification. Family means two or more persons related by blood, marriage, or decree of court, including:
  - i) a husband, wife and dependent children; and
  - ii) a parent or guardian and dependent children
  
- b. Count the income of all the persons in the youth's family above at the time of self-certification. Included in income are gross wages and salaries (before deductions), regular payments from social security, worker's compensation, veteran's payments, unemployment insurance, alimony and regular insurance or annuity payments. You may multiply last month's income by 12 months, or use last year's annual income, whichever is more reflective of that person's *current* economic situation.
  
- c. If a person is *unemployed* at time of self-certification, gross income from wages is **zero**. If person is working *part-time* at time of self-certification, annualize income by multiplying that week's or last week's wages by 52 weeks, multiply last month's wages by 12 months, **or** use last year's annual income, whichever is more reflective of that person's *current* economic situation.
